

# AFT Manufacturing

As a full-service sheet metal fabricator, AFT Manufacturing excels at meeting the stringent regulations of this industry. We are known for precision engineering producing quality products, on-time delivery and competitive pricing. At AFT, we think of each customer as a partner, and we work hand-in-hand with our partners as each project flows from concept to completion.

## AFT Manufacturing...

- Can perform short run, medium run and progressive die stampings.
- Works with numerous production materials including: steel, stainless steel, aluminum, sheet metal and yellow metals.
- Offers complete in-house design, engineering and tool room support.
- Can complete value-added services including sub-assembly and final-assembly.
- Has internationally acclaimed process design and assembly lines.

## Metal Stamping

AFT Manufacturing's variety of high capacity, multi-ton presses, metal forming equipment and large, on-site metal inventory make short order of even the most complicated projects. We specialize in:

- |                   |            |               |            |
|-------------------|------------|---------------|------------|
| • Bottom Piercing | • Coining  | • Die Forming | • Marking  |
| • Notching        | • Punching | • Stamping    | • Trimming |

**Providing solutions to your sourcing needs.**

## AFT Services

Custom Fasteners & Parts

Kitting & VMI

Import & MILL Shipments

Metal Stamping & Mfg.

Plating & Coating

## Engineering & Design

Every project begins with a customer's plan or one of our own professionally engineered designs. Putting our decades of experience in CAD and the metal stamping and fabrication business to work, we partner with you to form a plan for all customer logistics from pre-project scope development to final delivery.

## Metal Fabrication

Upon completion of the planning and design phase, AFT puts its expertise in metal forming and fabrication to work to produce high-quality sheet metal parts in the quickest turn-around time possible. Low-tolerance precision parts require precision fabrication, which AFT excels at. These fabrications include:

- Shearing
- Chiseling
- Welding
- Joining
- Hammering
- Press Brake Bending

## Laser Cutting

Laser cutting is one of the most sought after processes in metal fabrication, possessing several benefits over mechanical cutting such as increased precision with less warping and contamination. Using the most trusted name in laser cutting technology, the Trumpf TruLaser 3030, AFT is equipped to handle your company's laser cutting requirements.

## Assembly Services

Component assembly, joining two or more parts into a final assembled product, is just one of the value-added services that AFT provides. We assess your product's specifications, assemble, and deliver a quality-assured product. Save time and resources by outsourcing your component assembly to AFT.

## Quality Assurance

As an ISO certified manufacturing company, AFT practices rigorous quality control. We are only successful when our customer's expectations are met in full. Our philosophy is that "quality control is every person's responsibility on every project." We perform precision tests at various points in a project's life cycle to assure that our customers are satisfied with the final product delivered.
