

Self-aligning pads, self-righting, style C, with external thread, flattened ball, smooth

Item description/product images

Description

Material:

Ball steel, ball seat high-carbon steel.

Version:

Ball hardened, ball seat phosphated.

Note:

The self-aligning pads serve as stops, rests and thrust pads in fixture construction. The seating face returns to the start position when the load is removed.

Ball secured against rotation.

Self-aligning pads, self-righting, style C, with external thread, flattened ball, smooth
